

Welcome to the Future!

Where the world becomes your class

At the entrance gate of a university in South Africa the following message was posted for contemplation:

“

Destroying any nation does not require the use of atomic bombs or the use of long-range missiles. It only requires lowering the quality of education and allowing cheating in the examinations by the students.

”

Patients die at the hands of such doctors

Buildings collapse at the hands of such engineers

Money is lost at the hands of such economists & accountants

Humanity dies at the hands of such religious scholars

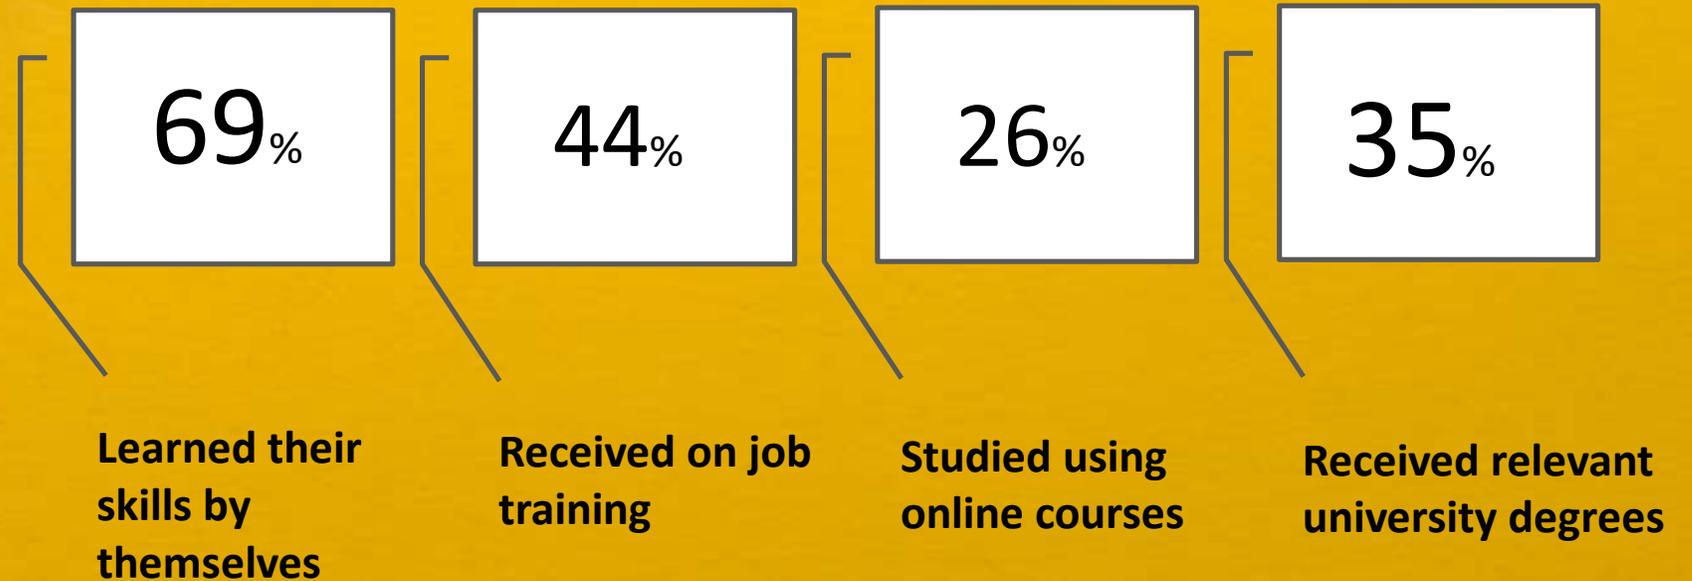

Justice is lost at the hands of such judges

The collapse of education is the collapse of the nation

A Survey among 40,000 professionals reveals that...

Students learn the best
from when they do
anything by themselves,
not when they are studying

There is no such thing as bad student

It is the credibility of a teacher if he/she can guide the students properly

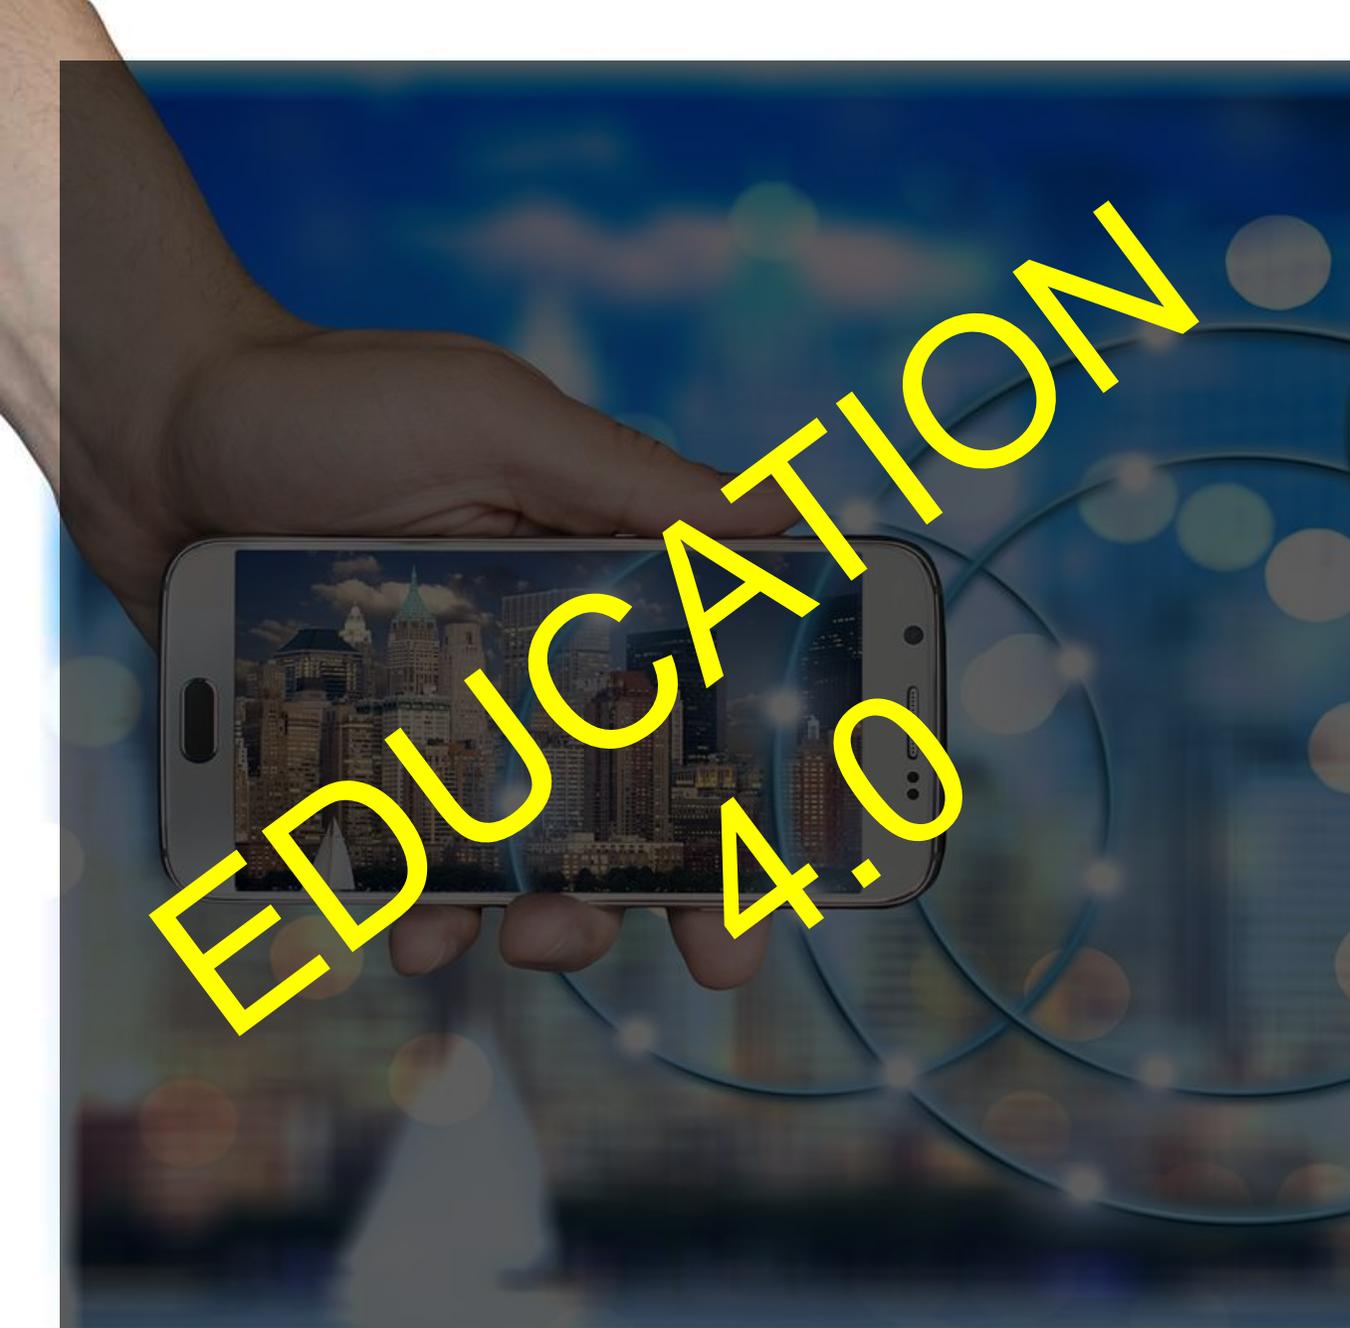

To Cultivate
The Future

We need to
Change
Our **100** Years
Old Tradition

The background of the image is a long-exposure photograph of a starry night sky, showing numerous curved white lines representing star trails. A solid dark blue horizontal band is overlaid across the middle of the image, containing the text. Two thin, light green horizontal lines are positioned above and below the text within the blue band.

What **Change** We Need?

A hand holding a smartphone displaying a cityscape, with the text 'EDUCATION 4.0' overlaid in large yellow letters.

EDUCATION
4.0

Universities need to provide unrivalled student experience & be at forefront of knowledge creation to remain relevant in the age of Education 4.0
